# Heated Merchandisers Full-serve or self-serve

HMR 103 3-well full-serve heated merchandiser

Henny Penny HMR heated merchandisers are designed to provide operators with the ultimate in flexibility and performance for hot food display and service.

The HMR series lets operators choose and combine full-serve and self-serve heated merchandisers in five different widths.

The HMR 103 3-well merchandiser comes as a stand-alone full-serve or self-serve unit. Perfect for expanding menus or introducing a new hot-food program into the retail environment.

Full-serve versions feature THERMA-VEC<sup>®</sup>, the exclusive even heating process developed by Henny Penny to keep foods at precise temperatures for a more appetizing and attractive display. No more cold spots or fogged glass!

THERMA-VEC<sup>®</sup> Even Heat Process eliminates hot/cold spots and fogging by gently circulating heat from lower elements evenly under pans, up through vents front and back, and over food. Sensors adjust temperature and air flow promptly to compensate for heat loss when serving.

Upper and lower heating are independently controlled, with separate controls for upper radiant heat over each well.

Two curved front glass profiles are available.

See separate data sheets for 4, 5, 6, and 7-well models, and for merchandiser bases available in profile or pedestal styles and in several heights and colors.

# Standard features

- 3-well model available as full-serve Control lockout to prevent or self-serve unit
- Exclusive Therma-Vec<sup>®</sup> Even Heat Process holds food at precise temperatures with no cold spots or • Brilliant halogen lamps for fogging
